BULBS...

Fall 1933

FAIR OAKS
BULB GARDENS

Woodburn, Oregon

Daffodils

To grow daffodils successfully the soil should be deeply dug and well pulverized. If enrichment is desired, well rotted compost may be worked into the soil a foot or more below the surface, or bone meal may be applied at the rate of 4 oz. to the square yard. Plant the bulbs three times their own depth or so that the base of a bulb measuring 2 inches is set 6 inches below the surface.

Our prices are for standard size double nose bulbs for garden planting. Mammoth bulbs 25% more. Round nose bulbs 25% less. Small bulbs 50% less.

	Doz.	100
LONG TRUMPET		
CLEOPATRA—An improved Emperor	\$ 1.20	\$ 8.50

Iris

DUTCH IRIS

The hardiness and wonderful coloring of the new Dutch Iris make them very popular for garden purposes, and they are unsurpassed for cut flowers. If cut as the first bud

is opening, they will keep for two weeks in water. They begin to bloom early in May and continue into June. The bulbs should be planted in October.

D. HARING—White, very large flower.

E. B. GARNIER—Uniform deep blue.

Lilies

Lilies are among the loveliest of the hardy plants, and lend a charm to the summer garden that cannot be obtained without their use. The ideal situation for lilies is in the hardy border, provided it is well drained and not too crowded, for here they will have the necessary shade for the ground, while their beautiful blooms will stand out against the background of green.

	Each	Doz.
BULBIFERUM—Rich apricot flowers in umbel at top of stem. Bulbils in axils of leaves. Early June25	3.50
